What are Fractals? â€” Fractal Foundation Fractal patterns are extremely familiar, since nature is full of fractals. For instance: trees, rivers, coastlines, mountains, clouds, seashells, hurricanes, etc. Abstract fractals â€” such as the Mandelbrot Set â€” can be generated by a computer calculating a simple equation over and over.

Fractivities â€” Fractal Foundation With support from the Albert I. Pierce Foundation, our fractivities are aligned with common core standards in mathematics and English language arts so you can more easily incorporate teaching fractals in your classroom, combining science, math and art. Fractals are patterns that repeat at different scales: If you zoom in on a picture of a fractal, you will still see the same pattern repeated. These patterns can be found in math equations, and they can also be found in the world all around us, from snowflakes to the leaves on trees.
